

RAMP™ Adhesion and Cure Promoter

To be Used with Buddy Rhodes Vertical Mix™

Product Overview

RAMP™ is a low viscosity liquid polymer adhesion and cure promoter developed specifically to be used with the Buddy Rhodes Vertical Mix™ curable concrete. Adding RAMP™ ensures proper cure of Vertical Mix and improved the overall physical properties. It also reduces water and salt absorption and greatly enhances freeze/thaw resistance.

Preparation

This product has a limited shelf life and should be used as soon as possible. KEEP FROM FREEZING. Store and use at room temperature (73° F / 23° C). Wear long sleeves and disposable vinyl gloves in a well-ventilated area when using this product.

Use as an Adhesion Promoter

Apply a primer coat of RAMP™ before mixing and applying Buddy Rhodes Vertical Mix™ curable concrete. Mix 100 parts RAMP™ with 100 parts water (50/50). Apply over all surfaces using a spray bottle, pump sprayer, or similar. Allow to become tacky before applying Vertical Mix. If primer dries completely, reapply and wait until tacky before proceeding.

Use as a Cure Promoter

Mix RAMP™ with clean water and Buddy Rhodes Vertical Mix™ in the following proportions:

Recipe for Buddy Rhodes Vertical Mix™

	Buddy Rhodes Vertical Mix™	Buddy Rhodes RAMP™	Water
By Weight	34 lb (15.4 kg)	3 lb (1.36 kg)	7.5 lb (3.4 kg)
	[100 Parts]	[8.82 Parts]	[22.06 Parts]
By Volume	1 Bag of Vertical Mix	42 fluid oz. (1.24 l)	115 fluid oz (3.4 l)

IMPORTANT: Read the full technical bulletin for the Buddy Rhodes Vertical Mix before using.

RAMP™ Packaging Options and Corresponding Quantities of Buddy Rhodes Vertical Mix™

	Weight/Unit	Corresponding Quantity of Vertical Mix
1-Gallon Unit	6.5 lb (2.95 kg)	Pair with 2 bags of Buddy Rhodes Vertical Mix™
5-Gallon Pail	42.5 lb (19.28 kg)	Pair with 13 bags of Buddy Rhodes Vertical Mix™
